Mad Science ©
My First Science Lab Camp
 (Ages 4-6)

This camp offers young children an exciting introduction to basic environmental science. Each session is devoted to different aspects of the outdoors allowing children to progressively enrich their understanding of how living things grow and how they interact with the environment around them. During the course of each session, children will perform hands-on experiments, play themed games and enjoy a snack and story related to the theme for that day. A mural will grow through the course of the program as children illustrate their latest discoveries at the close of each session.
