WEATHER GUIDELINES

From Lightning:

- We will not start or continue any activity* when a Thunderstorm or Tornado Warning has been issued for the area surrounding our fields.
- We will not start or continue any activity* if we see lightning or hear thunder.
- If we have seen lightning or heard thunder, we will not re-start any activity* until 30 minutes after we see the last lightning strike or hear the last thunder.
- The best place to be when lightning is in the area is in your car. Do not stay under trees or shelters if lightning is in the area – this will NOT protect you from lightning strikes!
- Parents, Players and Spectators will inform Coaches, Field Marshals, and Referees about any signs of lightning or news about Severe Weather Warnings. Referees (with the help of Coaches and Field Marshals, Referee Coordinator or Field Supervisor) will decide when games should be suspended due to severe weather and communicate the decision appropriately at all fields.

From Extreme Temperatures:

- We recommend that our Club Members do not start or continue any activity* when the temperature is above 95° F or below 35° F.
- If the temperature is above 90° F, we will stop for water breaks at least every 15 minutes during games and practices.

TO PROTECT OUR FIELDS:

- We will not start any activity* on our fields when it is raining hard.
- We will not start any activity* when the fields are very wet (even after rain has stopped).

The League Coordinator will decide when the fields are playable and will communicate this decision via the League Rainout Line: **913-686-6030 for Johnson County Park & Recreation District.**

For Stump or Swarner Park, the Club Field Coordinator will decide when the fields are playable and will communicate this decision via the Club Rainout Line: **9135-578-5319 for Metro United Soccer Club.**

* An activity is any event with physical exertion, e.g. game, practice, clinic, tournament, etc.
